

SMART FLOW

THE CHALLENGE

Omniplex Cinema Group is a diverse leisure and entertainment company consisting of 34 properties within Ireland and the UK. Omniplex Group was receiving large water bills every 6 months from their water retailer. They had no way of verifying their water bill accuracy outside of Managers taking daily readings. This was slow and time consuming.

THE OUTCOME

In a bid to improve their water consumption and costs. The Omniplex group looked for a reliable company to make a positive change. SMART FLOW has given Omniplex easy control of their water usage and costs. With real time visibility and notifications, Omniplex could clearly see all the underlying issues within their buildings. By partnering with SMART FLOW, Omniplex can clearly see large savings in daily water usage across all sites.

SMART FLOW has made significant enhancements by allowing OMNIPLEX to detect leaks, excessive usage, human error and appliance failure. This has significantly reduced Omniplex's water consumption.

BENEFITS

- 24/7 365 monitoring
- Instant alerts and notifications.
- Water bill validation
- Time saving - manually checking water meters and looking for issues.

Water Savings

Money savings

“SMART FLOW has given us more control, management is more engaged and looking for areas of saving. We have had small leaks in sites which would have gone overlooked in the past. This would have incurred large costs but potentially damaged the property also. We have also seen considerable savings.”

Graeme Moore

Group Loss Prevention Manager,
OMNIPLEX GROUP.
